permanent metal

slate roofing

Combining
slate's old-world
charm and the
unsurpassed
performance
of metal,
ArrowLine's
Slate roof is
the next wave
in roofing.

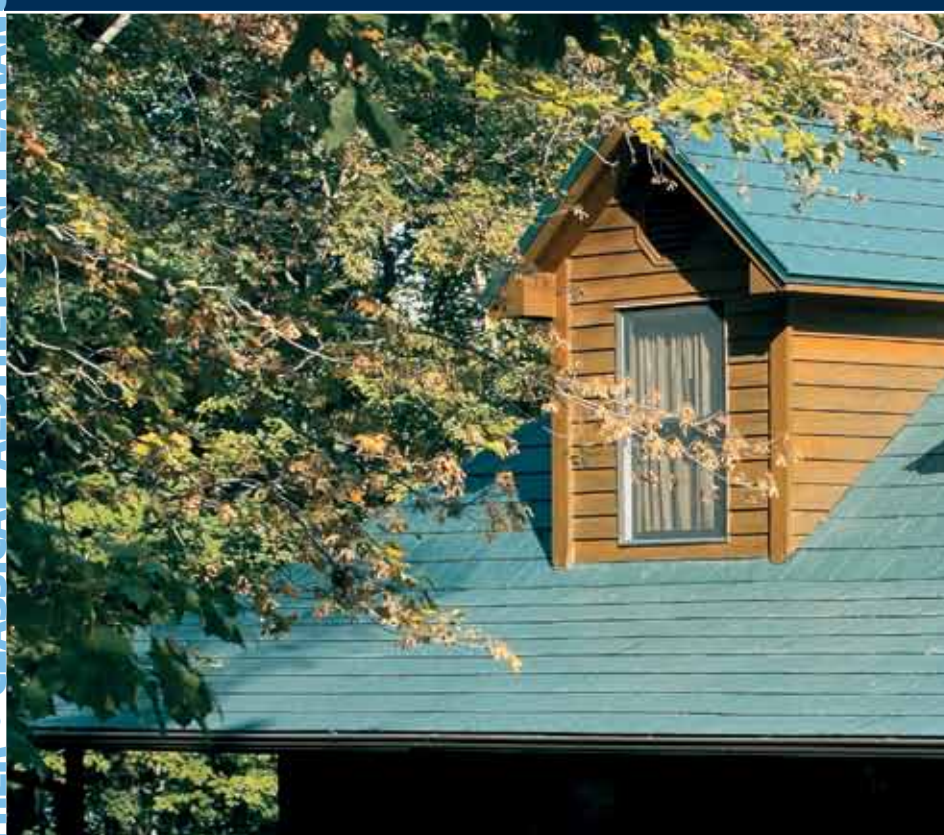

The "old-world" charm of ArrowLine is surpassed only by its durability

ArrowLine Slate's unique 4-way interlocking system withstands winds up to 160 mph, has the best hail rating available, and qualifies for lower insurance rates through some providers.

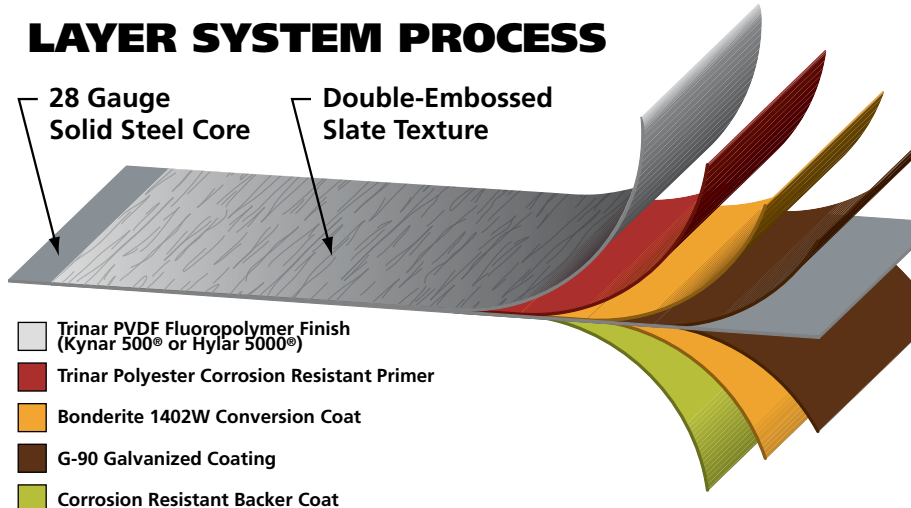

ArrowLine Slate is the perfect synergy of prestigious style and brute strength — available now for an aesthetic statement like none other.

Next wave in metal roofing

Lasting Beauty

Nothing lasts longer with lower maintenance than an ArrowLine Slate metal roof. Our talented team of engineers (backed by six decades of experience in the design and manufacturing of high quality building products) have taken every measure to ensure that ArrowLine Slate metal roofing withstands severe weather changes free from unsightly panel distortion, breakage, or 'shedding' like traditional slate materials.

ArrowLine's Slate metal roof is available in four ENERGY STAR® rated colors to complement new homes as well as remodeling projects.

Extreme Durability

ArrowLine Slate metal roofing is coated with Kynar 500®, the industry's premium finish, which is corrosion-resistant, withstands even the harshest outdoor conditions for decades and has superior color retention. We back our product with industry's best warranty. Period.

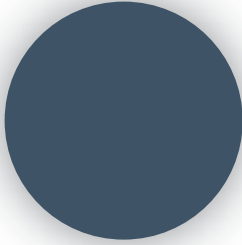

Design and Performance

Our virtually maintenance-free roof matches your lifestyle. It won't chip, peel, rot, blister, rust, shed, or fade. ArrowLine Slate provides a clean, distinctive look that vastly improves the appearance of your home or building while exceeding all building code requirements and maintaining our high standards for design and 'curb-appeal'.
